Mathematical Result

Mr. Harshvardhan

Department of Mathematics, G.B. Pant Memorial Government College Rampur Bushehar (H.P.), India

ABSTRACT: We Discuss Relationship Between Related to a Shape. There exist Several Types of figures an relationship between them In mathematics there exist several types of mathematical Relationship. Mathematics play an important role in Physics . We expand Euler work in this paper. There is a lots of Numbers are of Several Types. We Discuss Several Types Of Of Numbers In This Paper By Using This relationship a, b , This are Useful Variables. These Variables Play Important Role In Pure Mathematics. Variables Play an Important Role In Mathematics There Exist Several types Of Variables Variables are not Fix and can Shift Their Values According To Function Or Point. We Expand Euler Work In This Paper. There Exist Several Type Of Euler Relationship.

I. INTRODUCTION

We Discuss Relationship between Functions There exist Several types of functions in this we discuss trigonometric and logarithmic functions. We also discuss relationship between Numbers. Numbers are of several types. There are several uses of numbers. Numbers play an important role in mathematics there are several types of unsolved problems in mathematics based on numbers. There are several types fundamental numerical values in mathematics. In mathematics there is a lots of use of polynomial in Mathematics.

1.Heading 1.1

We discuss relationship between variables and numbers. There exist several Types of Numbers. Numbers are of Several Types. In mathematics. There is a Lots Of Use Of Numbers. There exist relationship between logarithmic Functions.

1. $\frac{1}{\log 2} = 3.32192809488736233478703194294294894$ Highest Number Means it Give Us Number at $\log 2 = 3.321 \dots$ This Is a Highest Number.
2. $\frac{1}{\sin 1} = 57.2968849855018347661268375174$ This Numbers is Highest Numbers. Then Other Numbers Like 2, 3, 4, 5,
3. $\frac{1}{\tan 1} = 57.2968849855018347661268375174$ This Numbers is Highest Numbers. Then Other Numbers Like 2, 3, 4, 5,

1.Heading1.2

We also expand Euler Work in This Ppaer.and Some another Othere topological results. There exist several types of results in the universe.

We Also Discuss Relationship Between $\frac{a+b}{2} - \frac{a+c}{2} =$ at $a=1, b=2$ and $c=4$

$\frac{1+2}{2} - \frac{1+4}{2} = \frac{3}{2} - \frac{5}{2} = -1$ This Expression is always Constant and Unique. At given values.

2. Subheading 1.2.

We Discuss Several Types Of Numbers In This Paper.

2. Subheading 1.2.

We also Discuss Variables in This paper. We also Discuss Variable Applicablity in This Paper. We Discuss Differential Equation In This Paper. Then We Cheak at $x=1$ We Get The Result. Applicability on Differential Equations. We Discuss Relationship Between Functions. We Alao Discuss Relationship Between Toplogical Space We Discuss Relationship Between Differential Equations.

Exist Relationship Between Differential Equations.

$\frac{(\frac{dM}{dy} - \frac{dN}{dx})}{N} = 1$. (at $x=1, y=1$) Putting Into This Function. This is true Only The Function. Higher to lower.

y^3, x^2

y^4, x^3

y^5, x^4

.....

.....

.....

.....

Example1:

$$y^3, x^2$$

$$M=y^3, N=x^2$$

$$\frac{dM}{dy}=3y^2, \frac{dN}{dx}=2x$$

$$\frac{(\frac{dM}{dy} - \frac{dN}{dx})}{N} = \frac{3y^2 - 2x}{x^2} \text{ (at } x=1, y=1 \text{)}$$

$$= \frac{(3y^2 - 2x)}{x^2} = 3 - \frac{2}{1} = 3 - 2 = 1$$

Exist Relationship Between Figures.

Figure:1

Exist Relationship in a Such a Way That:

$$\frac{1}{1} + \frac{1}{1} + \frac{1}{1} + \frac{1}{1} = 4$$

Conflict of interest: No conflict of interest. Self Made Research Paper. I not Want to Remove my Paper From The Journal IJRMETS .

Funding:

No funding

Author and affiliations:

Harshvardhan, G.B. Pant Memorial Government College Rampur Shimla (India)

Right and permissions:

Self made research paper.

Contributions: On numbers, Two Functions and Variables.

Instruction For Authors: Author of The Paper Harshvardhan.

Author Changing Form: No Other Author.

Additional information:

Must working on numbers, Two Functions And Variables.

Abbreviations:

Concept of numbers

Concept Of Trigonometric Functions.

Concept Of Log.

Mathematical Statement

Concept of variables

Data availability statement: ewmbomnxyze@gmail.com

Conclusion:

Increase knowledge about Numbers. Sequences and their types. It Also Increase Knowledge about Pure Mathematics.
