II. LITERATURE REVIEW

A literature survey in an exceedingly project report is that chapter that seem the assorted synthesize and analysis created within the field of your interest and also the results already revealed, taking under consideration the assorted parameters of the project and also the limit of the project. Literature survey helps to make your mind up our direction for analysis. Literature survey helps to line a goal for your analysis-hence it supplying you with your drawback statement. once you write a literature survey in respect of your project, you've got to put in writing the researches created by numerous analysts those square measure already revealed - & their methodology (which is largely their abstract) and also the conclusions they need fell upon.

This chapter can in the main discuss on the study that square measure done by previous analysis of alternative authors in the similar space of the gift study. Throughout this chapter, there can be comprehensive discussion on theoretical and sensible views of previous studies done in online looking and offline looking for apparels. This study combines factors that alternative studies have done which will influence the consumer's getting call in on-line and offline stores for apparels. It includes the worth attractiveness, time saving, perceived risk, enjoyment and excitement, materiality and

high interactivity. All of these factors can contribute to the study of customer's getting intention for apparels on each store that includes on-line and offline looking. Pan, (2007) outlined getting intention as the avidity of getting the product. Similarly, Engel, Blackwell and Miniard, (1990) defines getting intention as a psychological method of decision-making. In on-line looking, it's expected that shoppers square measure a lot of probably to associate worth attractiveness and time saving with their intention to buy whereas in offline looking, customers square measure a lot of probably to associate materiality, high interactivity and enjoyment with their intention to search. As a result, on-line marketers or retailers ought to be aware of the issues two-faced by the customers and their perceived risk to increase their intention to search in on-line. Designers should take note of customers' desires as a result of the usability is the beginning purpose to get the confidence and support of the consumers (Alzola et. al., 2006)

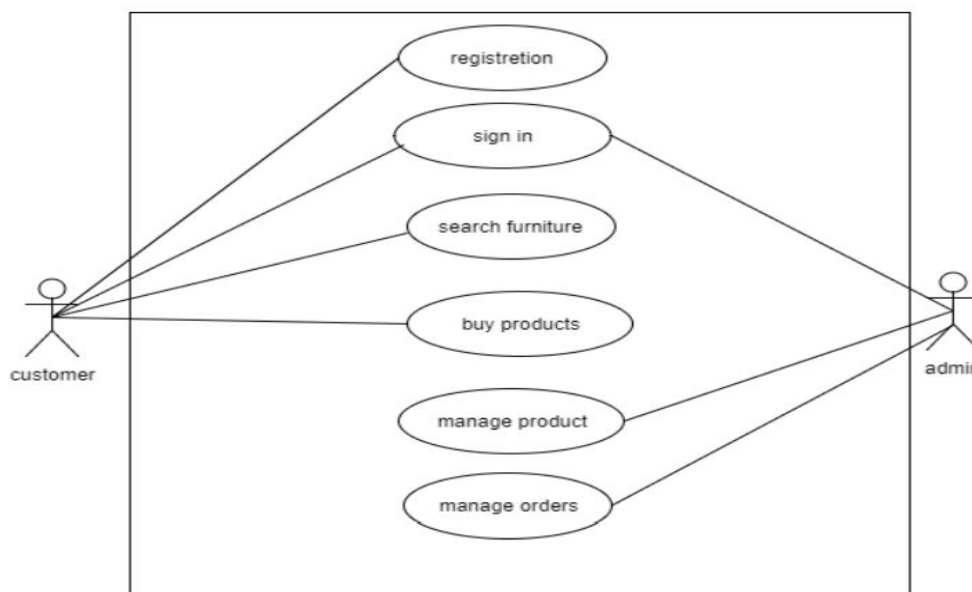

III. PROBLEM STATEMENT

The main objective of the Project on on-line furnishings search is to manage the main points of furnishings search, Category, Customer, Order, Furniture.
